

How to Mass "Create Custom Fields" in Salesforce? ...

Published Feb 7, 2019

Salesforce Bulk Object Field Creator is a native Force.com app designed to help you to manage configuration in few clicks. This application easily imports objects fields from **CSV or XLS or XLSX** file to Salesforce.

"A MUST have application in every admin or developer TOOLBOX...!!!"

IDEA:

During an application development in Salesforce, many times there is a need of creating multiple new fields of various data types. For a developers, it's always a tedious job creating them. In general such requests take couple of days of effort. Here is a handy tool to overcome this situation.

Solution: To make it **Quite Easily Done(Q.E.D)**, BOFC application helps user for **Mass Field Creation up to 500 fields of different types** in single go. It will reduce manual effort of creating multiple fields. This application has simple UI & follows simple steps. It is highly explanatory and easy to use.

- 4) **Manual One step field Creation-** You can manually add a field which needs to be created.
- 5) **Support Multi field type-** You can add any types of fields at a same time in single go.
- 6) **Restricts Identical fields-** App will restrict user to create duplicate fields which already exists
- 7) Option to choose which fields need to be created from list of fields.
- 8) Columns are **enabled or disabled** depending upon field type.

Steps to Bulk Create Multiple Fields in ONE GO:

1. Select the Object, Profiles and Layout to which newly created fields will be assigned.
2. Use Template (Refer sample template "Template" button) to add Multiple fields and Drag-drop or select excel/csv file, if fields.
3. Select your rows & verify all the details in required columns or remove error(if any).
4. Click "Deploy New Fields" button to add new fields to an selected object.
